

CAPABILITY STATEMENT

SPECIALIST ROPE ACCESS & WORK AT HEIGHT SOLUTIONS

WHO WE ARE

CEO Access is a Highland-based specialist access contractor established to deliver safe, efficient and professional work at height solutions across the Highlands and throughout Scotland. CEO Access was created to provide clients with a modern service built on technical competence, clear communication and meticulous planning.

Built from the ground up, CEO Access is committed to developing long-term client relationships by delivering reliable, cost-effective solutions with safety and quality at the forefront of every project. Using IRATA rope access techniques, we safely access difficult or restricted locations while reducing the need for scaffolding or mobile elevating work platforms (MEWPs), helping clients minimise disruption, reduce project costs and maintain operational efficiency.

Whether supporting planned maintenance, inspections, installations or emergency response, every project is approached with professionalism, attention to detail and a commitment to delivering the highest standard of service.

| ▲ Renewable Energy | ▲ Construction | ▲ Infrastructure |
| ▲ Hydro Power | ▲ Commercial Buildings | ▲ Local Authorities |

HEALTH, SAFETY & QUALITY

Safety, professionalism and quality underpin every project we undertake. All work is planned around a documented safe system of work, supported by task-specific risk assessments and method statements, rigorous equipment inspection and traceability, and technicians selected for verified competence and experience. We maintain a culture of continuous improvement, reviewing our systems and performance through our Corrective Action Management System (CAMS) to ensure standards are upheld on every project.

OUR COMMITMENT

At CEO Access, safety, professionalism and quality underpin every project. We work closely with our clients to deliver practical access solutions that minimise disruption while maintaining the highest standards of workmanship.
